SUMMARY

Results-driven Full Stack Developer with 3+ years of experience specializing in the MERN stack (MongoDB, Express.js, React.js, and Node.js). Proven track record of designing, developing, and deploying scalable, responsive, and high-performance web applications.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, React Flow

Backend: Node.js, Express.js, REST APIs, MQTT, Socket.IO, Authentication & Authorization

Database: MongoDB, PostgreSQL

Cloud & DevOps: Azure App Services, Azure Blob Storage, Azure DevOps, GitHub Workflows

Tools: Git, GitHub, Postman, React Query, State Management, Agile Development

Specializations: MERN Stack, Real-Time Applications, IoT Platforms, BLE Communication, Chrome Extension

WORK EXPERIENCE

Celebal Technologies, Jaipur

Full Stack Developer | July 2024 - Present

- Develop and maintain full-stack web applications and enterprise solutions using React, Next.js, Node.js, TypeScript, and cloud technologies.
- Collaborate with clients, product teams, and cross-functional stakeholders to gather requirements, deliver demos, and translate business needs into technical solutions.
- Design and implement scalable RESTful APIs, authentication systems, and backend services, ensuring security, performance, and maintainability.
- Build advanced frontend features including LiDAR point-cloud visualization, BLE device integrations, and real-time data processing capabilities.
- Contribute across multiple client projects, driving feature development, code quality improvements, testing, and successful production releases.

Intourist, Jaipur

Full Stack Developer | Apr 2023 - June 2024

- Developed and maintained web applications and travel portal solutions using PHP, WordPress, HTML, and CSS.
- Built responsive user interfaces, customized WordPress themes and plugins, and implemented new features based on client requirements.
- Integrated third-party APIs and backend services to support booking workflows, content management, and customer-facing functionality.
- Collaborated with designers, QA engineers, and project stakeholders to deliver reliable, user-friendly web experiences.
- Contributed to performance optimization, bug fixing, testing, and production deployments across multiple client projects.

PROJECTS

Transposer Chrome Extension | React, Web Audio API

Link: <https://chromewebstore.google.com/detail/transposer-transpose-pitc/bhlokigpgcdidlakfodbghhgbdpgaobb>

- Developed and published a Chrome extension for real-time audio pitch shifting, tempo control, and equalizer adjustments across online audio and video platforms.
- Implemented low-latency audio processing and playback controls using browser audio APIs to support musicians, learners, and content consumers.
- Achieved **4,000+ weekly active users** on the Chrome Web Store with a 4.5+ user rating.

AI-Powered Mining LiDAR Analytics Platform | Next.js, Node.js, FastAPI, AWS Cognito

- Built a full-stack platform for processing, visualizing, and reporting large-scale LiDAR scans used for mining bolt anomaly detection through AI/ML models.
- Implemented secure file ingestion workflows using AWS S3 and AWS Cognito, enabling scalable processing of high-volume point-cloud datasets.
- Developed interactive 3D point-cloud visualization and reporting modules to support engineering analysis and operational decision-making.

IoT Device Monitoring & Analytics Platform | React, Node.js, BLE, MQTT

- Developed a web platform for ingesting, monitoring, and visualizing telemetry data from IoT and BLE-enabled embedded devices.
- Built real-time dashboards, reporting modules, and device management workflows to support operational monitoring and data-driven insights.
- Integrated BLE communication and device configuration capabilities for seamless interaction with field-deployed hardware.

Real-Time Contact Center Intelligence Platform | React, SignalR, TypeScript

- Developed real-time dashboards and agent-assist interfaces for a contact centre analytics platform using SignalR-based live data streaming.
- Built visualizations for call insights, sentiment indicators, conversation metrics, and operational monitoring to support customer service teams.
- Optimized frontend performance for high-frequency real-time updates while maintaining a responsive user experience.

EDUCATION

Master of Computer Applications (MCA) | 2022 – 2024

Rajasthan Technical University, Kota

ACHIEVEMENTS

- Winner of the Rajasthan Digifest × TIE Global Hackathon for developing a Smart Canal Irrigation Monitoring & Management System using IoT sensors, LoRa communication, React, Node.js, MongoDB, GeoJSON, and real-time data streaming.
- Winner of the AI + Data + CRM Summit Hackathon at Wipro for building an innovative technology solution focused on operational efficiency and data intelligence.
- Winner of ISIM Hackathon 2.0 for creating an IoT-enabled Smart Parking System featuring ESP32 devices, real-time occupancy monitoring, mobile booking, and web-based management dashboards.
- First Runner-Up at HACK JKLU 3.0, a 36-hour competitive hackathon focused on innovation, rapid prototyping, and problem-solving. Third Position in an IoT-Based Hackathon organized by AIET Jaipur.
